ESSENTIAL MEDICAL SCREENING

1495 Euros

THE EXECUTIVE

ESSENTIAL MEDICAL SCREENING

Welcome to our basic Executive Essential Screening Programme. This health screening option is recommended if you want a quick but significant checkup with the focus on cancer. It is recommended to anyone over 30 years of age, and younger, if there is illness in the family. It is also available to our Premium Screening clients annually for a discounted price. This checkup takes 2-3 hours.

The programme covers:

-  Survey with the doctor about your previous health, heredity, present situation and lifestyle.
-  Clinical examination by doctor with lung function test.
-  Essential Blood, Urine and Feces tests for cancer.
-  MRI Thorax and normal x-ray if indicated.
-  MRI Abdomen, including all organs and extra scans for liver, pancreas and bile ducts.
-  MRI Pelvis, including all organs and extra scans for prostate (men) and uterus/ovarium (women).
-  Follow up Consultation with our Executive Doctor.
-  Treatment and control at the clinic of newly discovered diseases. If necessary, referral to specialist.
-  Written summary of findings and USB with images.

A comprehensive cancer focused checkup can be strengthened and more accurate by the addition of further investigations, as listed below. Please request any one or all of these tests to make your check up more robust, or ask for our screening doctor to contact you to discuss your individual needs.

THE EXECUTIVE

ESSENTIAL MEDICAL SCREENING

Optional:

	Skin cancer risk by dermoscopy ¹	150 Euros
	Nutritional consultation for cancer risk ²	150 Euros
	Full blood panel ³	400 Euros
